

## Parent-handout for the first parent evening

### **Dear Parents of the future first-graders!**

It's not long now, until your child takes the leap from kinder garden to primary school, which is a very big and important step in the life of your child!

We would like to reassure you that we will make the educational change-over as smooth as possible for your child. Your child will be introduced to ways of scholastic learning by adding to the knowledge, that has already been acquired both at home and in kinder garden.

Please help out as well, so that your child has the most successful and happy transition possible.

80% of the information, that is acquired during the learning process, is taken in through the visual senses. Many learning difficulties (to our experience) are caused by various visual defects.

Please have your child see an eye specialist before the beginning of term in September, in order to diagnose and rectify any potential visual defects by purchasing a pair of glasses!

Also make sure your child has enough opportunities to relax their eyes both now and in future.

Overuse of smart phones and computers can worsen shortsightedness.

Allow your child to spend as much time as possible out doors and in natural light!

By doing so you may rest assured knowing that you have contributed not only to their scholastic success but also to their future!

Thank you very much for your help, regarding your child!
